

## Wire Mesh Cable Trays, EG, Wire Diameter: 4 mm, Height: 35 mm, Width: 100 mm

### Description

Wire mesh cable trays are produced from high mechanical strength steel wire. The mesh permits continuous airflow to help prevent heat buildup. This open design also prevents the accumulation of dust, contaminants and bacterial proliferation and is primarily used for the support of low voltage, telecommunication and fiber optic cables. The life expectancy of a cable support system is dependent on the environment in which it is placed, therefore it is important to establish the corrosive properties of an environment to ensure that the right treatment and the right materials are chosen.

#### Features & Benefits:

- Fast and simple on-site assembly
- Light weight yet strong and effective- can be handled by one person
- Simple fixing systems
- Open trays allow air circulating to keep wiring cool and makes for easy identification of cable

Dimensions

Wire Diameter	4
Width	100.0
Height	35.0
Length	3000.0
Weight	1.56
Finish	EG
